TECHNOLOGY USE BY STUDENT

2015 – 2016 School Year Regulations for Student Acceptable Use of School Technology Resources

St. Joseph School provides technology resources to its students and staff for educational and administrative purposes. The goal in providing these resources is to promote educational excellence in St. Joseph School by facilitating resource sharing, innovation and communication with the support and supervision of parents, teachers, and support staff. The use of these technology resources is a privilege not a right.

With access to computers and people all over the world comes the potential availability of material that may not be considered to be of educational value in context of the school setting. St. Joseph School firmly believes that the value of information, interaction, and research capabilities available outweighs the possibility that users may obtain material that is not consistent with the educational goals of the school.

Proper behavior, as it relates to the use of computers, is no different than proper behavior in all other aspects of school activities. All users are expected to use the computers and computer networks in a responsible, ethical, and polite manner. This document is intended to clarify those expectations as they apply to computer and network usage and is consistent with school policy.

REGULATION TEXT: Use of St. Joseph School's Technology Resources

Improper use of St. Joseph School Technology Resources is prohibited. Uses of St. Joseph School Technology Resources that are prohibited include, but are not limited to:

- Violating students' rights to privacy/confidentiality.
- Attempting any unauthorized access to any computer system.
- Downloading unacceptable materials.
- Violating copyright law.
- Downloading, installing or storing software on a school computer without the approval of appropriate school personnel.
- Changing or attempting to alter any configuration, program, password on any computer system.
- Using a school computer without knowledge/approval of school personnel responsible for the computer.

- Using inappropriate language, pictures, and gestures in any form on the Internet.

GENERAL INFORMATION:

The Internet, a worldwide telecommunications network that allows millions of computers to exchange information, is accessible to students. The school has the right to place reasonable restrictions on the material accessed or posted throughout its system.

The school provides Internet access to students as a means to facilitate resource sharing, innovation, and communication. Information gathered from the Internet is viewed in the same manner as other reference material in the school; such resources enhance the learning environment.

School personnel provide guidance to the student in Internet use and monitor the program to the best of their ability as a regular instructional activity. Controlling all materials on a global network is impossible, and an industrious user may discover inappropriate information or perform inappropriate actions in spite of adult supervision. Therefore, the school encourages parents to have a frank discussion with their children about Catholic Christian values and how those beliefs should guide student activities while using the Internet.

School personnel will:

- Teach proper techniques and standards for internet participation.
- Guide student access to appropriate areas of Internet.
- Assure that students understand that misuses of the Internet could result in loss of access privileges.
- Monitor related concerns...privacy, software policy, copyright laws, e-mail etiquette, approved/intended use of school's Internet resource sources.
- The student must sign an Internet Use Agreement before the student is given access to the school's Internet resource. School personnel or the parent/guardian may withdraw student Internet access at any time.
